Professional Summary

Software Engineering undergraduate with experience in full-stack application development, REST API integration, database management, and software development practices. Proficient in building scalable web solutions, implementing secure backend functionality, and collaborating in Agile environments. Strong foundation in Object-Oriented Programming (OOP), Data Structures, and problem-solving techniques.

Technical Skills

Programming Languages: Python, JavaScript

Frontend: HTML5, CSS3

Backend: Django

Database: MySQL, SQLite

Tools: VS Code, PyCharm

Version Control: Git, GitHub

Concepts: OOP, Data Structures, SDLC, Agile, Debugging, Analytical Thinking

Internship Experience

Dhee Coding

Feb 2026 – May 2026

Technical Trainee | Python Full Stack and Generative AI

- Developed and deployed 3+ full-stack web applications using Python, MySQL, HTML, CSS, and JavaScript, improving application functionality and user experience.
- Integrated 5+ REST APIs and streamlined front-end/back-end communication, reducing data retrieval time by approximately 20%.
- Collaborated in Agile development cycles using Git and GitHub, contributing over 20 code commits while ensuring timely project delivery.

Projects

Full Stack Daily Expense Tracker

2026

Django, Python, JavaScript, HTML5, CSS3, Bootstrap, SQLite

- Engineered an expense management platform using Django, SQLite, JavaScript, HTML, and CSS, incorporating 10+ features such as authentication, transaction tracking, and budget reporting.
- Built secure authentication, authorization, and CRUD functionalities to manage and process 100+ transaction records while ensuring data integrity and user security.
- Created interactive dashboards and reporting modules for expense categorization, income analysis, and financial tracking.
- Optimized database queries and application architecture using Django ORM and SQLite, achieving approximately 15% faster response times and improving data retrieval efficiency.

Smart Underground Mine Safety System

2025

Arduino, LoRa, IoT Sensors, Embedded Systems

- Designed an IoT-enabled mine safety solution utilizing Arduino, LoRa, and environmental sensors for real-time underground monitoring.
- Implemented multi-sensor data acquisition using temperature, humidity, and gas sensors to support automated risk identification.
- Implemented LoRa wireless communication for long-range transmission of sensor data and emergency alerts, ensuring reliable connectivity in underground environments.
- Worked within a 3-member team to design, validate, and deploy the solution while ensuring system reliability and performance.

Education

East West Institute of Technology, Bangalore

2022 – 2026

Bachelor of Engineering in Electronics and Communication Engineering

CGPA: 8.40

Sharadha Vidyanikethan PU College

2020 – 2022

Pre-University Course (PUC)

CGPA: 9.35

Sri Krishna International Public School

2019 – 2020

SSLC

CGPA: 9.37

Certifications

- Programming in Python – NPTEL SWAYAM (2024)
- Developer and Technology Job Simulation – Accenture Forage (2025)
- Software Engineering Job Simulation – Accenture Forage (2025)

Extracurricular Activities

- Actively participated in group discussions and collaborative activities to strengthen communication, teamwork, and interpersonal skills.
- Pursued continuous learning through technical reading and online courses to enhance logical reasoning and technical proficiency.

Languages

English, Kannada, Marathi, Tamil
